PROFESSIONAL SUMMARY

Software Engineer building and operating e-commerce platforms, backend services, native mobile products, and enterprise integrations across multiple consumer brands. Hands-on experience with Ruby on Rails/Spree, JavaScript/TypeScript, React, React Native/Expo, Node.js, PostgreSQL, SQL Server, Docker, and production operations. Owns technical decisions, code reviews, incident response, and integrations connecting ERP, marketplaces, EDI, shipping, tax, inventory, and order-management systems.

TECHNICAL SKILLS

CORE: Ruby on Rails, Spree Commerce, JavaScript, TypeScript, React, React Native, Expo, Node.js, Express, PostgreSQL, SQL, REST APIs, Docker

E-COMMERCE & INTEGRATIONS: SAP Business One, EDI/X12, Mirakl, CommerceHub, ECGrid, marketplace, shipping, tax, inventory, and order-management integrations

PRODUCTION & OPERATIONS: New Relic, Git, Linux, Windows Server, background jobs, performance troubleshooting, incident response, root-cause analysis

ADDITIONAL EXPERIENCE: ColdFusion, C#, Python, Django, Vue.js, SQL Server

PROFESSIONAL EXPERIENCE

DANIELS CORPORATION - Tampa, FL

Software Engineer | Current role

- Own architecture, development, and production support for e-commerce and enterprise integration systems serving Laifen USA, Delphi Glass, Diamond Tech Crafts, and Jupiter Bike.
- Build and maintain applications, backend services, APIs, and background processes using Ruby on Rails/Spree, Node.js/Express, ColdFusion, PostgreSQL, SQL Server, and Docker.
- Design and maintain integrations connecting SAP Business One, marketplaces, EDI providers, shipping carriers, tax services, inventory systems, and order-management workflows.
- Make technical and architectural decisions, participate in code reviews, investigate production incidents, and coordinate resolutions with internal teams and external vendors.
- Automate order processing, data exchange, shipping, inventory, and operational workflows that previously required manual intervention.
- Monitor production systems and troubleshoot application and database performance using New Relic, application logs, and SQL diagnostics.

HAVANA UNIVERSITY - Havana, Cuba

Computer Scientist | 2019 - 2021

- Contributed to computer science research and software initiatives spanning academic and practical applications.
- Applied programming, data, and problem-solving skills to support university technology projects.

BYT - Havana, Cuba

Web Developer | 2018 - 2020

- Built web applications for a digital solutions and marketing company, translating business needs into working product features.
- Improved operational workflows and user experiences through custom web development.

SELECTED PROJECTS

VitalCoach - Offline-first React Native/Expo fitness app with AI workout planning, local SQLite data, notifications, scheduling, and Apple Health integration.

GiftSwap Mobile - Cross-platform React Native app with events, wishlists, real-time chat, notifications, deep links, and an Express/PostgreSQL API.

Shirt Customizer - Interactive React and Three.js product customizer with image upload and AI-assisted asset generation | [Live demo](#)

EDUCATION

Bachelor's Degree in Computer Science

Enrique Jose Varona University - Havana, Cuba
